revolution

WHY US

- 100% BIODEGRADABLE
- 100% RECYCLABLE
- 100% PLASTIC FREE
- 100% COMPOSTABLE
- ELEMENTARY CHLORINE FREE

The sugarcane pulp we use is **Elementary Chlorine Free (ECF)**. Most manufacturers use chlorine to bleach their pulp which is extremely detrimental to the environment.

Our products are **oil and soak proof**. Our products also happen to be **microwave and freezer safe!**

The additives used in the production process are US-FDA approved and PFAS (PFAS — Per-and Poly-fluoroalkyl) free.

Our products are **100% plastic free** and are made from virgin sugarcane bagasse pulp. They're also completely compostable and **break down within 90 days** of the composting process!

SOAK AND OIL PROOF

BIOSWAG

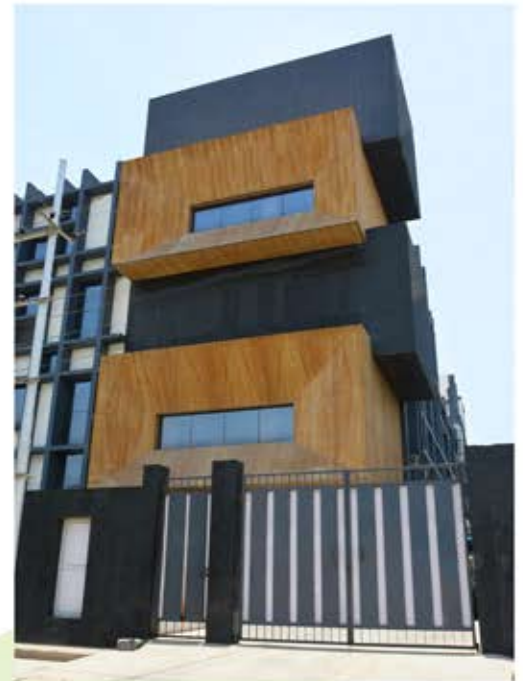

ABOUT US

BioSwag not only produces 100% biodegradable products in the true sense but also is committed to a green production facility which in no way leaves a negative impact on the environment.

Our state of the art, closed water loop facility assures zero contamination and hygienic products.

This certified green facility runs on green-fuels, resulting in no harmful emissions when producing our products. The water used to manufacture a product, utilises one fourth of the water required to wash a utensil of a similar size.

It also contains a sewage treatment plant, preventing chemicals or pollutants from entering the water table. All our equipment is made from food grade 304 stainless steel as per ASTM standards.
